

CARPET FINISHING/ WRAPPING TABLE

Description

The Catinet wrapping table has been designed to enable fast and comfortable handling of all types related to a carpet: final brushing, edge gluing, stain removing as well as and wrapping, performed on the smallest possible space.

Depending on the model the table has a working width of 3 or 4 meters, a capacity for packing plastic bag being used for packaging and a footswitch operating carpet's movement.

Vacuum cleaning systems consists of a rotary brush placed along the table and two vacuum cleaners. The height of the brush adapts automatically to the height of the carpet.

Machine is all made in stainless steel quality AISI 304 (except the vacuum).
